SUMMARY

Frontend Engineer with 5+ years of experience specializing in the React ecosystem with Fullstack capabilities (Node.js/Python). Experienced in architecting scalable platforms with a strong focus on performance and system design. Proficient in AI-assisted engineering (**Cursor**, **Copilot**, **LLM** workflows) to accelerate sprint velocity without compromising code quality.

HARD SKILLS

Programming languages: TypeScript, JavaScript, Python
Frameworks & Runtimes: React.js, Next.js, Node.js, NestJS, Gatsby.js
State Management & Frontend Tech: Zustand, Effector, Redux (RTK), TanStack (Query/Table), React Hook Form, Zod
Data Visualization: XYFlow (React Flow), D3.js, Chart.js, Matplotlib (Python)
Backend & APIs: REST API, WebSocket, tRPC, JWT / OAuth 2.0, Swagger (OpenAPI), Stripe
Databases & Caching: PostgreSQL / SQL, MongoDB, Prisma (ORM), TypeORM
Testing: Playwright (e2e), Vitest, Jest, Testing Library
Tools & Analytics: Git, Docker, Postman, Sentry, PostHog, Storybook
UI Frameworks: Tailwind, Shadcn (Radix-ui), MUI, Ant Design, Bootstrap
AI Engineering Tools: Cursor, Claude, Copilot, LLMs (Prompt Engineering, Code Gen, Refactoring)

EXPERIENCE

Superscript Systems | e-commerce domain **|** outstaff **|** Mar 2024 - Jul 2026
Projects: titlepool.com **/** firsttouch.com **/** wallet.niftybridge.io **/** superscriptsystems.com

- Spearheaded performance optimization, reducing LCP/TTI by 15–40% and significantly decreasing memory footprint through efficient memoization and virtualization across 2 production platforms.
- Engineered interactive node-based workflows using XYFlow (React Flow) with custom drag-and-drop, edge routing, and state syncing via Zustand, powering visual automation builders across products.
- Set up observability and user behavior tracking by integrating Sentry and PostHog, accelerating frontend error diagnostics by 30% in production.
- Integrated Stripe (Embedded UI / Elements) into the frontend checkout flow, handling payment states across 100% of customer checkout transactions.

Technologies: Next.js, React.js, TypeScript, Tailwind, TanStack, Effector, Zustand, XYFlow (React Flow), React-Hook-Form, Zod, Stripe (Embedded), Sentry, PostHog, NestJS

Risesoft | crypto domain **|** contract **|** Dec 2023 - Mar 2024 **|** Tokenization of Real Assets (RWA)

- Built end-to-end typesafe API layers using T3 Stack (Next.js, tRPC, Prisma), eliminating runtime type errors and accelerating contract-to-UI feature delivery by ~15%.
- Developed 8+ interactive financial and analytical dashboards using D3.js and Tailwind, enabling real-time visualization of asset tokenization, liquidity metrics, and portfolio performance.
- Established frontend engineering standards from scratch: configured ESLint/Prettier rule sets, strict TypeScript configs, and project documentation, aligning the codebase for multi-developer scaling.

Technologies: T3 stack, Next.js, TypeScript, tRPC, Prisma, Tailwind, NextAuth, Redux, D3.js, Wagmi

Brander | e-commerce domain **|** outsource / outstaff **|** Dec 2022 - Oct 2023
Projects: shop.kyivstar.ua **/** businessadmin.a1st.app

- Contributed to high-load e-commerce solutions (including shop.kyivstar.ua), building responsive catalog, product, and checkout flows optimized to handle 50,000+ daily active users and a catalog of 10,000+ SKUs.
- Engineered real-time data synchronizations using WebSockets and Redux Toolkit, providing instant order status updates and interactive administrative dashboards (businessadmin.a1st.app).
- Delivered a production-ready e-commerce MVP from scratch within 4 months, owning frontend architecture, state design, and multi-language support (i18n).
- Mentored 2 junior developers via structured code reviews, architectural pairing, and best practice workshops, helping them transition to independent feature ownership.

Technologies:
React.js, Next.js, TypeScript, Redux, Styled Components, WebSocket, Material UI, i18n, Scrum

---

DevsX | e-commerce & well-being domain **|** contract **|** Jul 2022 - Nov 2022
Projects: happylemonusa.com **/** Fitness web-platform

- Rapidly launched an MVP for a wellness/fitness web platform, designing a library of 25+ reusable UI components with Next.js and Tailwind.
- Redesigned core user dashboard modules for happylemonusa.com, improving mobile responsiveness and cross-browser consistency.

Technologies:
React.js, Next.js, TypeScript, Redux, Tailwind, Styled Components

---

AIHelps | e-commerce domain **|** product **|** Feb 2021 - May 2022
Project: suplery.com

- Co-developed core frontend modules from scratch for the B2B e-commerce platform suplery.com, building clean, responsive UI with React, TypeScript, and Ant Design.
- Onboarded and mentored 3 new frontend engineers, established code review workflows in Jira, and collaborated closely with backend and UI/UX teams.
- Translated 40+ Figma screen mockups into pixel-perfect, reusable components.

Technologies:
React.js, TypeScript, MobX (MST), Ant Design, Styled Components, i18n

---

Velas Network AG | crypto domain **|** product **|** May 2020 - Oct 2020
Project: velas.com

- Implemented responsive UI components and features for velas.com using React, Redux, and MUI.

Technologies:
React.js, Redux, Material UI, Styled Components

COURSES

- **Frontend Developer Course –** Andersen Lab (Dec 2019 – Mar 2020)
- **Frontend Developer Course –** CyberBionic Systematic (Aug 2019 – Nov 2019)

EDUCATION

Kyiv International University | 2006 – 2011
Master's Degree in International Relations

LANGUAGES

English – Upper-intermediate (B2)
Ukrainian – Native
